Me favorite films are James Bond 007! The genre are action and science fiction with a part of history. This films are adapted from the books of the writer Ian Fleming. He wrote twelve novels. The first was Dr. No in 1962 the last was For your eyes only.

The character of the films are the same: action and special effects.

The film award winning for James Bond is the longest running and most financially successful English language films. Set in all region of the world, productet in studio too: in the Pinewood in London.

The films tells the story of a Commander officer in the British Secret Intelligence Service. Special effects and actions make fun to see this films. A little history is true, the big part is good science fiction . All twentytwo films are blockbusters with fifehundert millions and more box office totals.

James Bond has also been adapted for many other media, including radio plays, comic strips and video games.

The last film was Quantum of solare. I think this films was not the best of the 22 films! He had to much actions effects and not the good bad guy actor and the good stars Sean Connery or Roger More. I does `nt like Daniel Craig.
